

2009-02-27

Dear Dr. Wozak,

This letter is confirmation from the events sponsors that ITH Icoserve registered to test the Notification of Document Availability (NAV) profile at the IHE North America Connectathon, February 23-27 in Chicago, IL. The system they tested includes both the Notification Receiver and Notification Sender actors in the NAV profile and implements all options defined in the profile.

Unfortunately, the potential testing partners in this profile withdrew. We are thus, under the testing regulations of the Connectathon, unable to award ITH Icoserve an official successful testing result. However, upon visual inspection by the IHE Technical Project Managers, ITH Icoserve's implementation was deemed to be in compliance with the profile specifications.

We commend ITH Icoserve as an early adopter of NAV and other IHE profiles.

Sincerely,

A handwritten signature in black ink that reads "Christopher D. Carr".
